THE SOURCE EVALUATIONS IN THIS REPORT ARE DEFINITIVE.  
 THE APPRAISAL OF CONTENT IS TENTATIVE.  
 (FOR KEY SEE REVERSE)

1. The shortage of wood for railroad ties has led the Scientific Research Institute for Railroads in collaboration with the Research Institute for the Timber Industry to conduct experiments with ties made of several layers.
2. In 1953, 26 experimental ties, made of 3-4 layers jointed with artificial resin of great fenol content, were placed under railroad lines. The experiment was to continue in 1954 with further 300 ties.
